Course Description Form

1. Course Name:

Maternal & Neonatal Health Nursing

2. Course Code:

NUR301

3. Semester / Year:

Third Year/ semester 1 &2

4. Description Preparation Date:

10-2-2024

5. Available Attendance Forms:

Recording the student's attendance in theoretical lectures

- 6. Number of Credit Hours (Total) / Number of Units (Total)
- (8) Credit hours (3) hours per week for theoretical subject (2) hours for

lab. (12) hours for clinical training for a period of 15 weeks

7. Course administrator's name (mention all, if more than one name)

Name: Prof. Dr. Rabea Mohsen Ali : Email: Prof.dr. Rabea.M. Ali@alkutcollege.edu.iq Lecturer assist. Lyla Aoun

8. Course Description

This course is designed to assist the students:

To provide maternity nursing care for women and their newborn babies during normal and complicated pregnancy, labor, delivery, Postnatal, and for women who experienced gynecological problems, and those who have surgeries.

9. Course Objectives

Course Learning Objectives (Theory and Clinical):

By the completion of this course the student will be able to:

- ≠ 1-To enable the student to describe the structure & function of female
- & male reproductive organs.
- ♣ 2-To enable the student to state the hormonal& uterine changes that occur duri menstrual cycle, pregnancy & puerperium.

- 4 3-To enable the student to provide adequate nursing care for women during normal complicated pregnancy.
- ♣ 4- To enable the student to provide adequate nursing care for pregnant women during normal & complicated conditions of labor & delivery.
- ♣ 5- To enable the student to assist women during normal delivery conditions.
- 4 6- To enable the student to provide adequate nursing care for pregnant women duri normal & complicated puerperal period.
- ♣ 7- To enable the student to provide adequate nursing care for women who have obstetrical & gynecological problems & surgeries ..

10. Teaching and Learning Strategies

Lecture, Small groups work, Discussion, lab. Role play, demonstrations & clinical Training, & students self- learning

Learning Resources

♣ Whiteboard, data show & handout, films, CDs, midwifery lab., primary health care centers and maternity teaching hospitals, E-learning, flip chart, pamphlets & posters.

11. Course Structure			
Theoretical = 3 h			
Date of	Unit to be Covered and/or Activity		
Class			
Week 1	Human Reproductive system: Anatomy & Physiology -Puberty -Reproductive system (Anatomy & Physiology of male& female)Menstrual Cycle.		
Week 2	Pregnancy: Normal pregnancy -Development & physiology of fetus Physiological & Psychological changes of pregnancy		
Week3	-Pre-natal care		

Week 4				
- Nursing care during Pregnancy Induced Hypertension, - Nursing care during Gestational Diabetic, - Nursing care during Urinary Tract Infection, - Nursing care during anemia). Week 6 Normal Labor & delivery - Theories of labor onset Signs of labor Components of labor. Week 7 - Stages of labor Nursing management of each stage of labor Week 8 - Using of partograph in labor Week 9 Complication of labor - Nursing management during complicated labor & delivery. Week 10 - Obstetrical operation: Nursing care during obstetrical operation - Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 Puerperium: - Physiologic & physiological changes during Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 Family planning: - Objectives of family planning in Iraq Contraceptive methods in Iraq including emergency contraceptive Advantages & disadvantages of each method Role of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: - Physiological changes & adaptation to extra uterine environment Nursing assessment & management for high risk neonate Immediate & daily neonatal care Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 Nursing care for common gynecological disorders - Nursing care for common gynecological disorders	Week 4	Nursing care during complications of pregnancy		
Week 6 Normal Labor & delivery Theories of labor onset. Signs of labor Nursing management of each stage of labor Week 7 Stages of labor Nursing management of each stage of labor Week 9 Complication of labor - Nursing management during complicated labor & delivery. Week 10 Obstetrical operation: Nursing care during obstetrical operation - Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 Puerperium: - Physiologic & physiological changes during Puerperium Nursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 Family planning: - Objectives of family planning in Iraq Contraceptive methods in Iraq including emergency contraceptive Advantages & disadvantages of each method Role of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: - Physiological changes & adaptation to extra uterine environment Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 Neck 15 Gynecological disorders: - Nursing care for common gynecological disorders - Nursing care for common gynecological disorders		- Nursing care during Ant partum Hemorrhage,		
- Nursing care during Urinary Tract Infection, - Nursing care during anemia). Week 6 Normal Labor & delivery - Theories of labor onset Signs of labor Components of labor. Week 7 - Stages of labor Nursing management of each stage of labor Week 8 - Using of partograph in labor Week 9 Complication of labor - Nursing management during complicated labor & delivery. Week 10 - Obstetrical operation: Nursing care during obstetrical operation - Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 Puerperium: - Physiologic & physiological changes during Puerperium Nursing management during normal Puerperium Nursing management during complicated Puerperium (PPH), Week 12 Family planning: - Objectives of family planning in Iraq Contraceptive methods in Iraq including emergency contraceptive Advantages & disadvantages of each method Role of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: - Physiological changes & adaptation to extra uterine environment Nursing assessment & management of neonate Immediate & daily neonatal care Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 - Nursing care for common gynecological disorders - Nursing care for common gynecological disorders - Nursing care for common gynecological disorders		- Nursing care during Pregnancy Induced Hypertension,		
- Nursing care during anemia). Week 6 Normal Labor & delivery - Theories of labor onset Signs of labor Components of labor. - Stages of labor Nursing management of each stage of labor Week 7 - Stages of labor Nursing management of each stage of labor Week 9 - Complication of labor - Nursing management during complicated labor & delivery. Week 10 - Obstetrical operation: Nursing care during obstetrical operation - Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 - Puerperium: - Physiologic & physiological changes during Puerperium Nursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH). Family planning: - Objectives of family planning in Iraq Contraceptive methods in Iraq including emergency contraceptive Advantages & disadvantages of each method Role of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Neek 13 Neonatal nursing care: - Physiological changes & adaptation to extra uterine environment Nursing assessment & management for high risk neonate Immediate & daily neonatal care Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 Gynecological disorders: - Nursing care for common gynecological disorders	Week5	- Nursing care during Gestational Diabetic,		
Week 6 Normal Labor & delivery -Theories of labor onsetSigns of laborComponents of labor. -Stages of laborNursing management of each stage of labor Week 8Using of partograph in labor Week 9 Complication of labor -Nursing management during complicated labor & delivery. Week 10 -Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, -C/S -induction & Augmentation of labor). Week 11 -Physiologic & physiological changes during PuerperiumNursing management during complicated Puerperium (PPH), Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management for high risk neonateImmediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 Gynecological disorders: -Nursing care for common gynecological disorders		- Nursing care during Urinary Tract Infection,		
-Theories of labor onsetSigns of laborComponents of laborComponents of laborNursing management of each stage of labor Week 7 -Stages of laborNursing management of each stage of labor Week 8 -Using of partograph in labor Week 9 -Nursing management during complicated labor & delivery. Week 10 -Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 -Physiologic & physiological changes during PuerperiumNursing management during complicated Puerperium (PPH), Week 12 -Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 -Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonateImmediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Nursing care for common gynecological disorders -Nursing care for common gynecological disorders		- Nursing care during anemia).		
-Signs of laborComponents of laborStages of laborNursing management of each stage of labor Week 8 -Using of partograph in labor Week 9 -Complication of labor -Nursing management during complicated labor & delivery. Week 10 -Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, -C/S -induction & Augmentation of labor). Week 11 -Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during complicated Puerperium (PPH), Week 12 -Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 -Noonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonateImmediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Signs of laborVersing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Signs of laborVersing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance	Week 6	Normal Labor & delivery		
-Signs of laborComponents of laborStages of laborNursing management of each stage of labor Week 8 -Using of partograph in labor Week 9 -Complication of labor -Nursing management during complicated labor & delivery. Week 10 -Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, -C/S -induction & Augmentation of labor). Week 11 -Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during complicated Puerperium (PPH), Week 12 -Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 -Noonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonateImmediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Signs of laborVersing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Signs of laborVersing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance		-Theories of labor onset.		
Components of labor.				
Week 8 -Stages of laborNursing management of each stage of labor Week 8 -Using of partograph in labor Week 9 -Complication of labor -Nursing management during complicated labor & delivery. Week 10 -Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, -C/S -induction & Augmentation of labor). Week 11 -Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 -Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 -Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management for neonateImmediate & daily neonatal careNursing assessment & management for newborn & its importance Week 14 -Nursing assessment & management for nigh risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Stages of laborNursing care for common gynecological disorders -Nursing care for common gynecological disorders				
-Nursing management of each stage of labor Week 9	Week 7	•		
Week 9 Complication of labor -Nursing management during complicated labor & delivery. Week 10 Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 Gynecological disorders: -Nursing care for common gynecological disorders	VVCCIX /			
-Nursing management during complicated labor & delivery. Week 10 -Obstetrical operation: Nursing care during obstetrical operation -Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 Gynecological disorders: -Nursing care for common gynecological disorders	Week 8			
Week 10	Week 9	Complication of labor		
Week 10		-Nursing management during complicated labor & delivery.		
Nursing care during obstetrical operation -Episiotomy, forceps, - C/S - induction & Augmentation of labor). Week 11 Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 Gynecological disorders: -Nursing care for common gynecological disorders	Week 10			
- C/S - induction & Augmentation of labor). Week 11 Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium (PPH), Week 12 Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: - Nursing care for common gynecological disorders	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	•		
- C/S - induction & Augmentation of labor). Week 11 Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium (PPH), Week 12 Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: - Nursing care for common gynecological disorders		-Episiotomy, forceps,		
Week 11 Puerperium: -Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
-Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders		- induction & Augmentation of labor).		
-Physiologic & physiological changes during PuerperiumNursing management during normal Puerperium. -Nursing management during normal Puerperium. Nursing management during complicated Puerperium (PPH), Week 12 Family planning: -Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	-Physiologic & physiological changes during Puerperium.		
Week 12 Family planning: -Objectives of family planning in Iraq. -Contraceptive methods in Iraq including emergency contraceptive. -Advantages & disadvantages of each method. -Role of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environment. -Nursing assessment & management of neonate. - Immediate & daily neonatal care. -Nursing assessment & management for high risk neonate. -Regulation of birth & death certificate for newborn & its importance Week 14 Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
-Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders		Nursing management during complicated Puerperium (PPH),		
-Objectives of family planning in IraqContraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders	Week 12	Family planning:		
-Contraceptive methods in Iraq including emergency contraceptiveAdvantages & disadvantages of each methodRole of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders		-Objectives of family planning in Iraq.		
-Role of Nurse in family planning in primary health care centers & hospitals including health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
health education & counseling. Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environment. -Nursing assessment & management of neonate. - Immediate & daily neonatal care. -Nursing assessment & management for high risk neonate. -Regulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonate. -Regulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders		-Advantages & disadvantages of each method.		
Week 13 Neonatal nursing care: -Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders		-Role of Nurse in family planning in primary health care centers & hospitals including		
-Physiological changes & adaptation to extra uterine environmentNursing assessment & management of neonate Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders		health education & counseling.		
-Nursing assessment & management of neonate Immediate & daily neonatal care Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 14 - Nursing assessment & management for high risk neonate Regulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: - Nursing care for common gynecological disorders	Week 13	Neonatal nursing care:		
- Immediate & daily neonatal careNursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
-Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
-Regulation of birth & death certificate for newborn & its importance Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 -Nursing care for common gynecological disorders				
Week 14 -Nursing assessment & management for high risk neonateRegulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
-Regulation of birth & death certificate for newborn & its importance Week 15 Gynecological disorders: -Nursing care for common gynecological disorders				
Week 15 Gynecological disorders: -Nursing care for common gynecological disorders	Week 14			
-Nursing care for common gynecological disorders		•		
<u> </u>	Week 15			
-Prolapsed of genital tract, benign & malignancy of genital tract & menstrual disorders),				
& Infertility		& Intertility		

12.Course Evaluation	
2 midterm theory exam	15%
Clinical evaluation	15%
Quizzes	5%
Report	5%
Final theoretical Exam	40%
Final clinical Exam	20%
Total	100 %
